To: HREIF --VCH0021A Helmut Reif RCARCHMA--VUS0212A Richard Carchman
UBEECKEN--VCH0021A Ulrich Beecken

From: Anthony J. Andrade
Subject: ETS EXPERIMENTS INVOLVING HUMAN EXPOSURE

I understand that while the company policy does not necessarily prohibit all ETS experiments involving consenting adults, it is obviously necessary to be sensitive to the human exposure issue in evaluating the scientific merit of individual research proposals.

Therefore, the basic question regarding the proposal by Dr. Scherer is whether it employs a sound scientific design and would add something to the scientific knowledge in this area. If Richard and Helmut could kindly take another look at the proposed project, we could then discuss their view of the scientific content and make a recommendation to Chuck as to whether Philip Morris should support the work.

Best regards.

Tony Andrade
